

Distinctive products for beautiful homes

the **Vintage** range

Superior design without compromise

When choosing replacement vertical sliding sash windows the architecture of your home and the location, style and purpose of its rooms are all key considerations.

The Vintage Range of sliding sash windows will transform any home, whether a traditional period property or a modern city residence.

We have been manufacturing and installing PVC-U home improvement products throughout our working lives, using the highest-quality components and the latest manufacturing technology.

High Security Hardware

Whilst our products meet all the demands of modern living, our meticulous approach to producing these Heritage windows lies rooted in the past. Sliding sash windows are an ideal solution for conservation areas and their authentic design will appeal to homeowners seeking to differentiate their home.

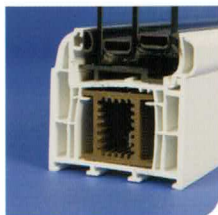

Energy Rated

Why choose The Vintage Range?

Our Vertical Slider is an authentic looking sash window and combines all the benefits of high-performing modern materials and functionality with period character and design.

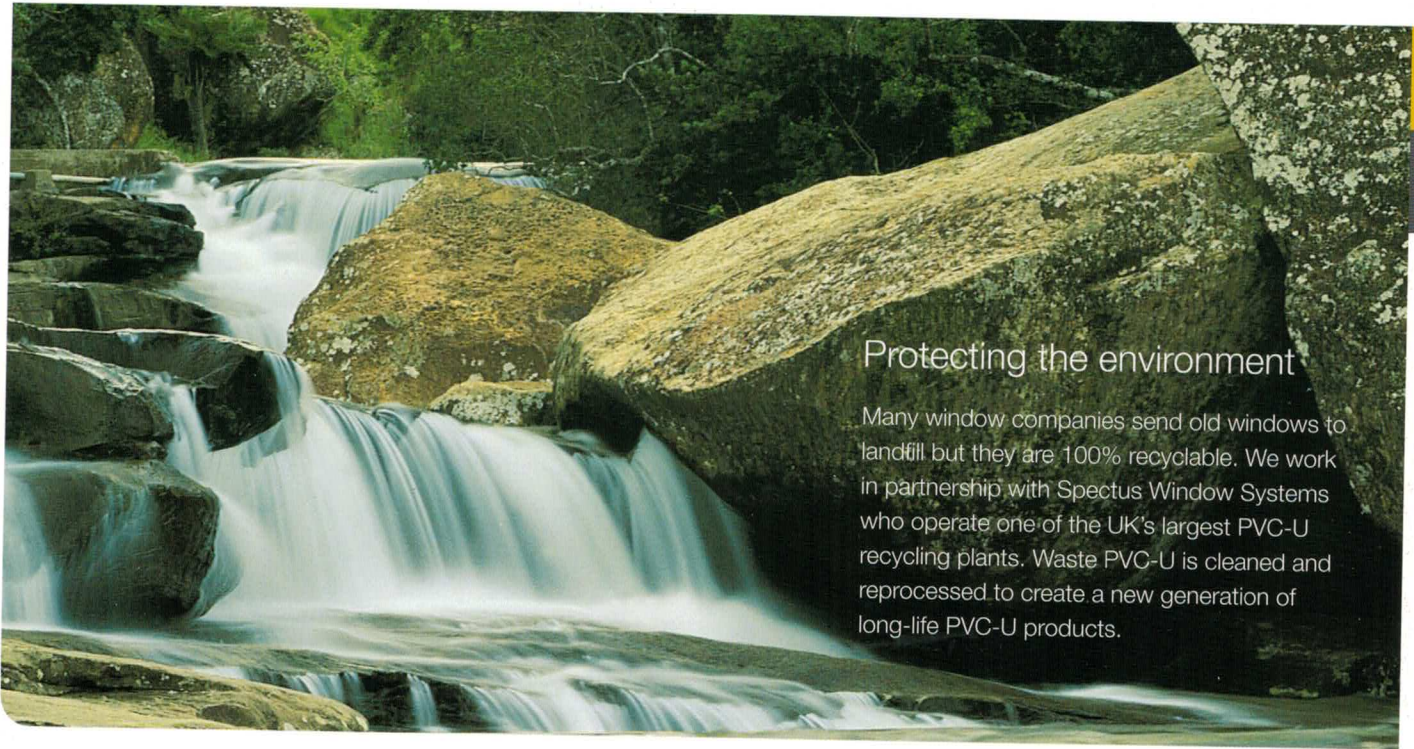

Precision-engineered PVC-U frames provide superior strength, thermal protection and weathering performance, and with minimum maintenance they will retain their appearance year after year.

Durable Recycled Reinforcement

Protecting the environment

Many window companies send old windows to landfill but they are 100% recyclable. We work in partnership with Spectus Window Systems who operate one of the UK's largest PVC-U recycling plants. Waste PVC-U is cleaned and reprocessed to create a new generation of long-life PVC-U products.

Traditional styling with modern benefits

Great care has been taken to retain the distinctive styling of traditional sash windows, whilst providing all the benefits of modern technology. Manufactured from the market-leading Spectus profile system, our vertical slider offers superior thermal efficiency, cutting your fuel bills and reducing your home's carbon footprint. With excellent weathering performance and ventilation, our Vertical Slider is fully approved and certified to appropriate British standards.

Product features at a glance

- 1) Low-maintenance PVC-U profiles with traditional styling
