

The **Ultimate**
Composite Door Collection

Standard Colour Range

Our colour collection has been specially designed to help you put together the perfect colour palette for your door. Every home is different and our beautiful range of colours combines both muted heritage shades and bolder vibrant options, to harmonise with your home. Keeping your Ultimate Collection Composite Door looking good for years to come.

Our standard colour options are quite varied and can cover most tastes. Doors are white internally as standard. Oak and Rosewood effects are stained and lacquered.

Custom Colour Range

Our custom colour options below opens up a world of choice. The Ultimate Collection Composite Doors can also be colour matched to any specific RAL colour provided. There are over 2500 RAL colours to choose from and each choice includes a 10 year guarantee.

Colours shown in the brochures and point of sale materials are for guidance only and are a fair representation, not an exact match. All images are as accurate as photographic and printing processes allow. There will be a difference between a colour printed, a colour displayed on a digital device and a colour sprayed onto a GRP skin or uPVC Frame.

Decorative Glass

The Ultimate Collection has an eclectic range of decorative glass. Whether your taste is traditional or contemporary, there's an Ultimate Collection composite door to suit any home.

Bullion

Deeply carved rings refract the light with stunning effect. Unlike traditional bullions, these opulent grooves are encapsulated within the insulated glass unit for ease of cleaning.

Cameo

An extremely popular option, 'Cameo' is a triple glazed decorative panel featuring crystal cut glass bevels. Backing textures have been carefully selected to compliment some of the most popular backing glasses used in side panels or top lights.

Crescent

Strikingly modern, the 'Crescent' is a bespoke model which combines an etched finish with a graduated clear motif. The design is encapsulated within the insulated unit to ensure its good looks are well protected for many years to come.

Deco

This linear design combining a satin effect backing glass and clear lines, offers a look of the utmost sophistication. Visually this style is very clean and crisp.

Edge

This well-known design is simple and elegant, working very well both in traditional and contemporary properties. Edge decorative glass combines a satin effect backing with clear dividing lines.

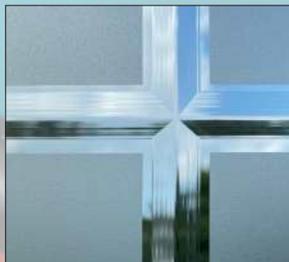

Grace

This lavish bevel cluster refracts light beautifully, with zinc came and hammered effect backing glass. It is a real statement piece. Available with Dual Glazed, Centre Glazed, Morse, Half Glazed and Half Glazed Arch door styles.

Polaris

This beautiful star sparkles with light. Bevels with zinc came, surrounded with a stipple effect that provides moderate levels of privacy. Available with Tops & Mids, Half Moon and Mids, Cottage/Cottage Framed/Flush/Stable - Short, door styles.

Nordic

This very clean option has a brilliant-cut bevel to its outer face with a very smooth sandblasted surrounding backing glass. The sandblast highlights particularly well the deeply grooved clear channels

Oasis

A wonderful, traditional stained glass design with the modern twist of being triple glazed. This vibrant model combines colourful antique-look cut glass with aged black came. Ideal for period and character properties.

Olympic

A contemporary backing texture with tinted grey, clear, cubic bevels and a striking zinc came. The triple glazed glass is encapsulated between two panes of tempered safety glass for ease of cleaning and to ensure its good looks will bring pleasure for many years to come.

Tate

Triple glazed decorative design at its very best! Black came, cut, hammered and stipple backing textures give a lovely, graceful look. Due to high demand, this choice is featured in most door styles.

Tri Line

Ultra-modern triple glazing with amazing laser-cut polished stainless-steel inserts. 'Tri Line' is a real showstopper, aesthetically stunning and perfect for the contemporary door.

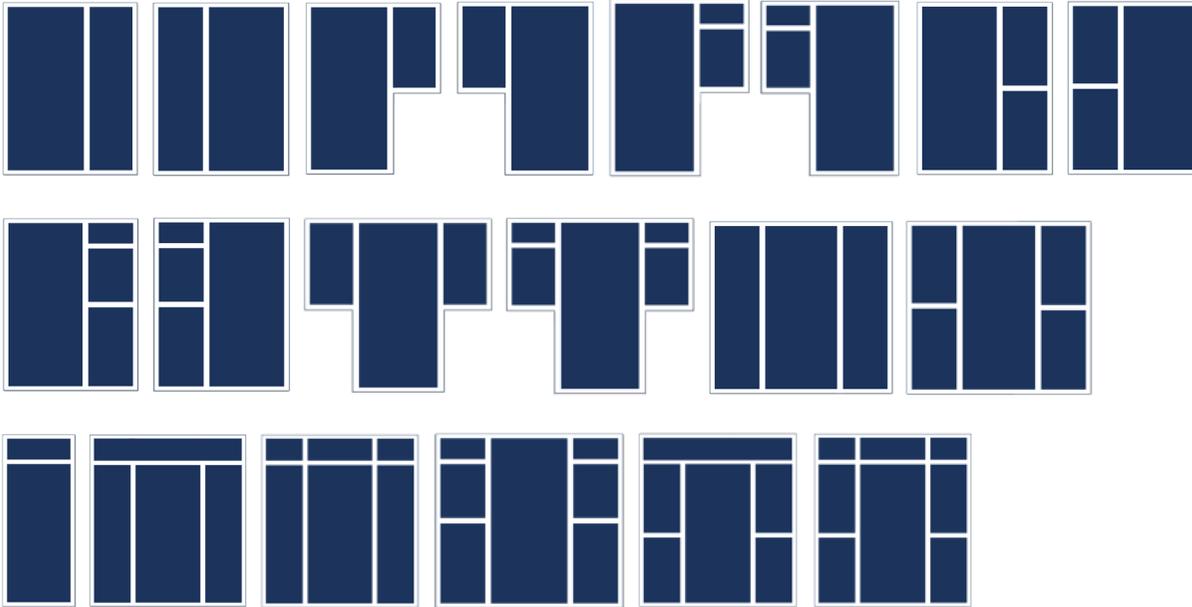

Trio Diamond

Trio Diamond is characterised by its distinctive diamond cut bevels, with brilliant cut starbursts to their centre. Triple glazed with zinc came and glue chip backing.

Frame & Profile

Flag, Side & Top Lights

All Ultimate Collection Composite Doors can be supplied with flags, side and top lights. Each one is custom made to your required size, colour and is either welded or coupled. What better way to maximise the light and make a statement to the entrance of your property?

Composite Side Panels

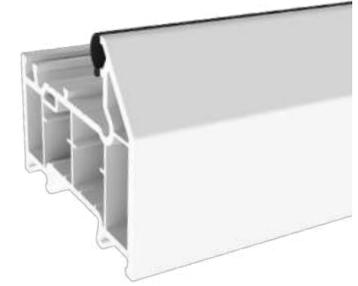

Side panels can add the ultimate finishing touch to a grand entrance. Your installer will be able to advise on sizes and limitations on configurations and designs. All of our colour options can be applied to both side panels and frames.

The Ultimate Collection Composite Door frames are manufactured from uPVC profile. Choose either the classic Sculptured rebate, or a Chamfered finish for the more modern look.

Sculptured

Chamfered

Standard uPVC Frame

The woodgrain effect is achieved with a special foil and is available in a variety of finishes, all of which can be applied inside and outside. Finishes include: White uPVC (no foil), Rosewood, Golden Oak, Black, Anthracite Grey, Cream and White woodgrain.

Custom Frame

Colour-matched to the door with a special foil and paint finish. Different door/frame colours can be chosen to further personalise your door.

Our custom colours offer the same choice as the custom door colour range. They are applied to a woodgrain effect foil, to ensure an authentic look and feel. We also guarantee the paint finish on our frames for 10 years.

Locking Options

For the ultimate in bespoke doors and for the more discerning buyer, we offer our fully suited collection of top quality handles, letterboxes and door knockers in a range of colours. Spy holes, letters and numerals are also available. The Ultimate Collection comes with a 10 year mechanical guarantee.

Standard Cylinders

Cylinders offer varying levels of security. Our 6-pin anti-drill/pick cylinder is one of the UK's biggest selling products and features protection to deter most amateur intruders.

'Keyed Alike' Cylinders

Any of our cylinders can be 'keyed alike' to another. So, if you are replacing two doors and want to keep your keyring to a minimum, keyed alike will provide one set of keys that will lock two or more doors.

APECS AP Cylinder

The APECS AP Cylinder is independently tested and a fully accredited 3 star security product with British Standard Institute TS007 accreditation. Capable of withstanding a variety of attack methods, this cylinder will deter the most determined burglars.

Ingenious Multi-Point Door Lock

The Ingenious multi-point door lock features 4 opposing 'pincer' action hook sets, a centre hook deadbolt and a sprung latch. Manufactured from stainless steel, its construction is thoroughly tested to last a lifetime.

Thumb-Turn Cylinders

No key is needed to lock the door from the inside and so as well as convenience you have safety built-in, in the event of a fire. NHBC recommendations include the use of thumb turns on all new build houses.

Thumb-turn versions of our cylinders are available to choose and the same security upgrades also apply. Our high security Ingenious cylinder is available as Thumb-turn in both brass and nickel finish to suit your hardware choice.

Autolock

There are two Autolock options. Both designed for the contemporary range of doors where bar handles, finger pulls or escutcheons are used instead of standard door handles.

The Heritage Autolock positions the locking cylinder at a more traditional shoulder level. The Contemporary is situated slightly lower from the middle of the door.

Heritage

Contemporary

Due to the exceptional strength that the APECS AP cylinder and the Ingenious Multilock or Autolock offers when used together, we are offering a break in guarantee of up to £5000 for your maximum peace of mind (T&Cs apply).

IF ONE OF THESE PRODUCTS FAIL AS A RESULT OF A BREAK IN, WE WILL GIVE YOU UP TO £5000 COMPENSATION.

INGENIOUS LOCKING

Rigorously tested and boasting impressive durability, these fantastic door lock options provide secure locking and optimal peace of mind. Ingenious locks are recognised by the police as offering the highest levels of security.

The Multi-point lock features two sets of opposing hooks for added functionality allowing it to fit seamlessly into the door. An ergonomically designed hold back snib on the faceplate prevents accidental lock outs whilst the use of the very latest high specification materials and manufacturing techniques have been utilised to provide smooth, flawless operation.

The Ingenious 'Autolock' option is an exceptional new development in lock design. Designed with the user in mind, it is immensely strong and so easy to use you don't even have to think about it!

Simply shutting a door with Autolock engages each latch firmly into place, no required lever lifting to engage the locking mechanism.

APECS[®]

APECS AP CYLINDER

This cylinder has been developed to offer the highest level of security against forced entry caused by a range of methods, including drilling plug extraction, picking, bumping and lock snapping, the most prevalent method of attack in a break-in.

Designed with a unique sacrificial point, it is engineered to snap in a manner that doesn't allow further damage to the lock inside. Featuring an interlocking mechanism with a unique cam protection block and operable from inside when the lock is tampered with externally, it also comes with a 5-year guarantee for added peace of mind.

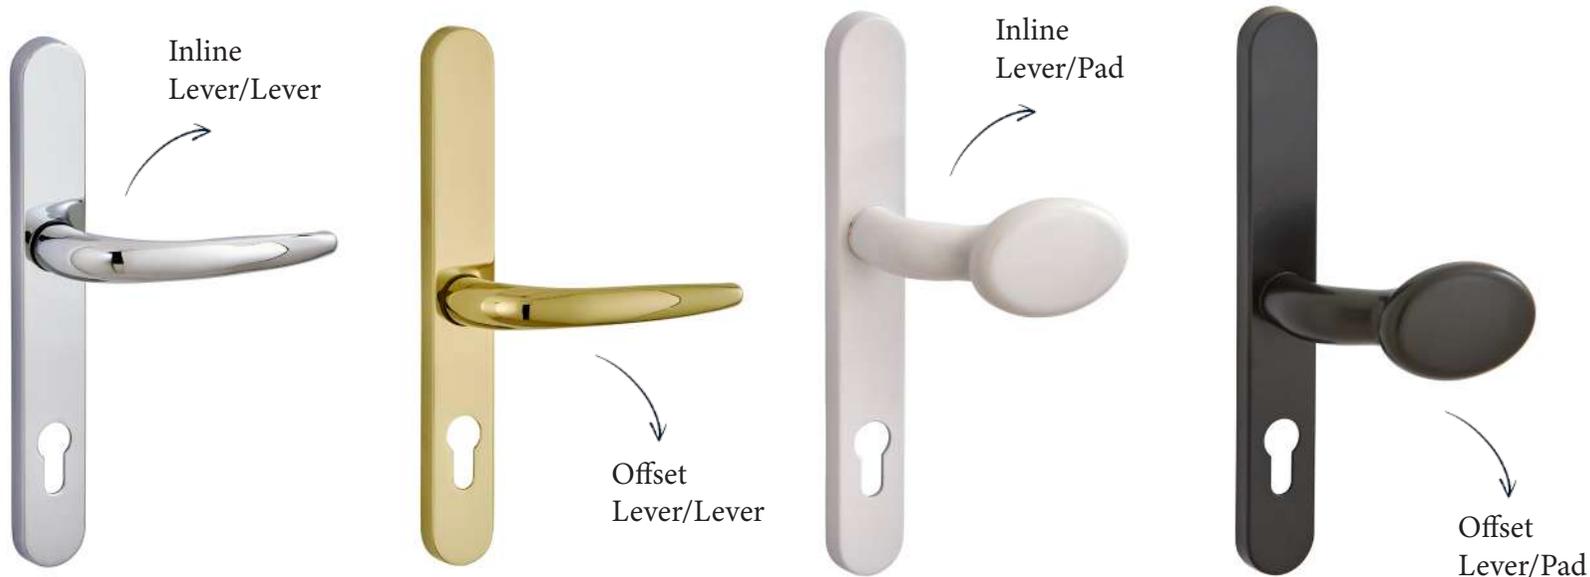

The APECS AP also benefits from a double locking mechanism with additional track rail pins and a patent pending ball-bearing connection which ensures additional operation smoothness and a strong fixing between the cylinder core and the cam.

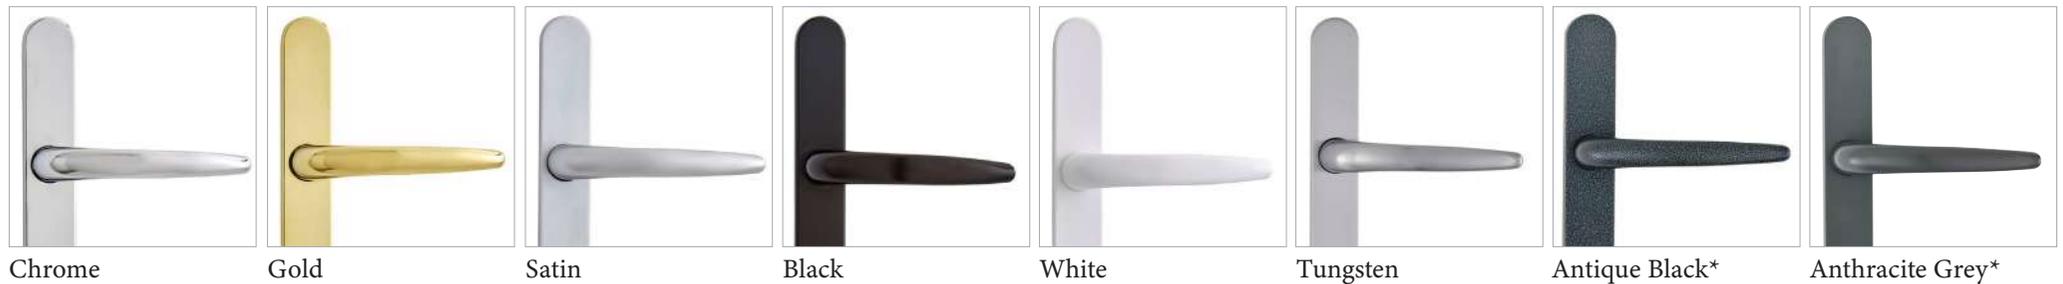

Handle Options

Lever and Pad Door Handles

Both Inline and Offset Lever/Lever and Lever/Pad Handle options work in conjunction with the Ingenious Multi-point door lock. All handle options below come with the Standard Cylinder or you can upgrade to the APECS AP Cylinder, which includes a £5000 break-in guarantee. Terms and conditions apply.

Colour Options

Autolock Handle Options

The Ingenious Autolock has various options for operation and access. Choose from the Heritage or Contemporary lock position, bar handles (internal and external or external only), or alternatively, a mixture of centre pulls, escutcheon and finger pulls.

All handle options below come with the Standard Cylinder or you can upgrade to the APECS AP Cylinder, which includes a £5000 break in guarantee. Terms and conditions apply.
